EXPERIENCE

Digital Forensics Intern Jun 2026 – July 2026
Ministry of Electronics and Information Technology (MeitY), Government of India *Delhi, India*

- **Spearhead digital forensics initiatives** within the selective Digital Forensics Internship Programme under the Ministry of Electronics and Information Technology (MeitY), Government of India.
- **Apply advanced digital forensic methodologies** to identify, preserve, acquire, and analyze digital evidence while strictly adhering to rigorous forensic and legal best practices.
- **Partner with cybersecurity professionals and forensic experts** to manage active incident response frameworks, execute cyber investigations, and reinforce national cybersecurity infrastructure.
- **Drive deep technical execution** in forensic analysis, evidence preservation protocols, modern investigative techniques, and complex digital crime investigations.

Cyber Forensic Intern Jun 2023
Delhi Police – Intelligence Fusion & Strategic Operations (IFSO) *Delhi, India*

- **Analyze live cyber fraud cases** alongside active investigators, specifically targeting high-priority financial exploits and complex call-center scams.
- **Execute volatile memory forensics and static malware analysis** on seized digital assets to successfully isolate malicious artifacts and recover critical evidence.
- **Conducted comprehensive digital investigations** utilizing industry-standard forensic suites and advanced networking techniques to map threat actor footprints.
- **Author rigorous forensic documentation** that meticulously preserves evidence integrity and serves as definitive technical support for legal investigations.

SECURITY RESEARCH PROJECTS

Independent Offensive Security Research *Vulnerability Discovery Disclosures*

- **Perform responsible security research** across diverse public codebases and enterprise web applications to actively identify, validate, and document high-severity logic flaws.
- **Discover and map critical threat vectors**, including OAuth Misconfigurations, Broken Access Control frameworks, and complex Business Logic Errors.
- **Author comprehensive vulnerability reports** containing full proof-of-concept (PoC) exploits and targeted developer remediation playbooks.
- **Collaborate directly with global security teams** to systematically patch vulnerabilities, securing modern cloud architectures and application ecosystems.

Mobile Forensic Analysis Digital Image Veracity *Digital Forensics Media Security*

- **Investigated hardware-software variables** across iPhone 13, 15 Pro, and 16 Pro Max devices and third-party applications (Instagram, WhatsApp) to map app-specific compression, artifacting, and digital traces.
- **Analyzed core forensic metadata** including EXIF structures, GPS geolocation tags, lens apertures, sensor configurations, and HEIC/JPEG file types to reverse-engineer image-processing pipelines for forensic investigations.
- **Built Python-based forensic tooling** using Pillow, pillow-heif, and hashlib in Google Colab, alongside ExifTool, to extract EXIF/GPS metadata, compute SHA-256 integrity hashes, and flag algorithmic histogram-clamping artifacts.

- **Quantified forensic data loss** introduced by third-party compression by comparing native camera captures (4032×3024, ∼4.2 MB, full EXIF/GPS) with Instagram uploads (1080×1350, ∼850 KB, stripped metadata, sRGB conversion).
- **Evaluated algorithmic compromises** affecting resolution, high dynamic range (HDR), and color accuracy to establish verifiable methods for confirming digital media authenticity.
- **Developed standardized testing frameworks** to systematically isolate image processing variables, improving modern forensic standards for extracting and preserving mobile evidence.

Video Conference Project *Full-Stack Web Application*

- **Developed a full-stack video conferencing application** with separate frontend and backend components to support real-time online meetings and communication.
- **Implemented the frontend and backend architecture** to connect client-side interactions with server-side application logic and meeting functionality.
- **Built real-time communication functionality** for video conferencing, enabling users to participate in online meetings through a web-based interface.
- **Integrated user and meeting workflows** to provide a structured experience for creating, joining, and managing video conference sessions.
- **Applied full-stack development practices** across the frontend and backend layers, including API communication, application logic, and responsive user interaction.

TECHNICAL SKILLS

Web Development	MERN Stack (MongoDB, Express.js, React.js, Node.js), HTML5, CSS3, REST APIs
State & Cloud	Redux, Context API, Docker, Cloud Platforms (AWS, Azure, GCP)
Programming & DB	JavaScript (ES6+), Python, Java, SQL, NoSQL (MongoDB), Bash
Methodologies	Agile Development, Git, GitHub, Code Reviews, Software Engineering Best Practices
Security	OWASP Top 10, Web Application Security, Bug Hunting, Burp Suite, AI Security

ACHIEVEMENTS

- **Secured 10+ global enterprise ecosystems** through responsible vulnerability disclosures, earning prestigious Hall of Fame recognitions from Inflectra, Shippit, Pipefy, Carsales, Process.st, Skipso, Sandtime.io, Bytebloggerbase, Nojoto, Appfluence, and The Forage.
- **Monetized offensive security capabilities** by identifying and validating high-impact security flaws, resulting in monetary bug bounty rewards from Aptible, The Forage, Chicksx, airslate, Make, Lyssna, Cryptohopper, and Autoklose.

EDUCATION

Master of Computer Applications (Generative AI) 2025–2027
SRM Institute of Science and Technology

Bachelor of Computer Applications (Cyber Security) 2021–2024
Poornima University

CERTIFICATIONS

- Google Prompting Essentials — Google
- Generative AI Virtual Internship — AICTE & AWS Academy
- AI/ML Virtual Internship — EduSkills Foundation (AICTE — Google for Developers)
- Cyber Ethics — Ministry of Electronics and Information Technology (MeitY)

- Android Bug Bounty Hunting: Hunt Like a Rat — EC-Council
- Ethical Hacking Essentials — EC-Council
- Certified Network Security Practitioner (CNSP) — The SecOps Group
